1. IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

1.1. Product identifier

<table>
<thead>
<tr>
<th>Trade name</th>
<th>PETOL PP 2725</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chemical name</td>
<td>Oxirane, methyl-, polymer with oxirane, ether with 1,2,3-propanetriol grafted with styrene, acrylonitrile; Glycerin, propylene oxide, ethylene oxide, acrylonitrile, styrene polymer</td>
</tr>
<tr>
<td>Chemical characterization</td>
<td>Polymer</td>
</tr>
<tr>
<td>REACH Registration number</td>
<td>Excepted from registration according to Regulation (EC) 1907/2006</td>
</tr>
<tr>
<td>Molecular weight</td>
<td>4500-4800</td>
</tr>
</tbody>
</table>

1.2. Relevant identified uses of the substance or mixture and uses advised against

**Petol PP 2725** is a non-reactive polymer polyol with about 24% solid content (styrene-acrylonitrile polymer particle) dispersed in a polyoxyalkylene polyol triol, designed for high resilience flexible slabstock polyurethane foams.

It is a BHT-free product and can be used both with and without auxiliary blowing agent to produce a wide range of foam grades, from low to high density.

Uses advise against: There are no uses advised against.

1.3. Details of the supplier of the safety data sheet

<table>
<thead>
<tr>
<th>Name</th>
<th>S.C. OLTCHIM S.A</th>
</tr>
</thead>
<tbody>
<tr>
<td>Address</td>
<td>1 Uzinei Street, 240050 Ramnicu Valcea, Romania</td>
</tr>
<tr>
<td>Phone N°</td>
<td>+40 250 701 785; +40 250 701 200 ext.2785, 3001, 3115</td>
</tr>
<tr>
<td>FAX N°</td>
<td>+40 250 739 760; +40 250 735 030</td>
</tr>
<tr>
<td>E-mail of competent person responsible for SDS in the MS or in the EU:</td>

</tr>
</tbody>
</table>
1.4. Emergency telephone number

| European Emergency N°: | 112 |
| Emergency telephone at the company: | +40/250/738141-available 24h/day/365days |
| For Romania- The institution responsible with providing information in case of a health emergency is The National Institute for Public Health, Department for the International Sanitary Regulation and Toxicological Information. | Telephone: 021.318.36.06, Opening hours: Monday - Friday from 8 a.m. to 3 p.m. |

2. HAZARDS IDENTIFICATION

2.1. Classification of the substance according to Regulation (EC) 1272/2008
Petol PP 2725 is not classified according to Regulation (EC) 1272/2008

2.2. Labeling according to Regulation (EC) 1272/2008
Signal word: No signal word
No label according to Regulation (EC) 1272/2008.

2.3 Other hazard: No other hazards identified.

3. COMPOSITION/INFORMATION ON INGREDIENTS

<table>
<thead>
<tr>
<th>Chemical name</th>
<th>CAS no</th>
<th>Classification according to Reg (EC) No.1272/2008</th>
<th>Concentration, % (w/w)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Glycerol propoxylated-co-ethoxylated</td>
<td>009082-00-2</td>
<td>no</td>
<td>77-75</td>
</tr>
<tr>
<td>Propoxylated, ethoxylated glycerol, styrene, acrylonitrile polymer</td>
<td>57913-80-1</td>
<td>no</td>
<td>23-25</td>
</tr>
</tbody>
</table>

Impurities: No impurities relevant for classification and labeling.
4. FIRST - AID MEASURES

4.1 Description of first aid measures

**General Advice:** If exposed or if you feel unwell: Call a Poison Center or doctor/physician. Show this safety data sheet to the doctor in attendance.

**If inhaled:** Remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Get medical attention immediately.

**In case of skin contact:** Remove contaminated clothing and wash before reuse. Wash skin with soap and plenty of water immediately at least 15-20 minutes, until no evidence of chemical remains.

**In case of eye contact:** Wash eyes immediately with large amounts of lukewarm water or normal saline, occasionally lifting upper and lower lids, until no evidence of chemical remains at least 15-20 minutes. Get medical attention immediately if pain, blinking, tears or redness develops.

**Ingestion:** Polyether polyol have low to very low oral toxicity. Swallowing small amount of this product is not likely to cause injury. If ingested, do not induce vomiting unless directed to do by medical personnel. Get medical attention.

4.2. **Most important symptoms and effects, both acute and delayed**

- **By skin contact:** Skin contact with the product is not like to result in a significant irritation.
- **By eye contact:** Contact with eyes cause slight temporary irritation.
- **By inhalation:** Due to low vapor pressure at room temperature, Petol polyols alone are not likely to be inhaled. In this case symptoms may include cough and sometimes slight dizziness. The product is not sensitising.

4.3. **Indication of immediate medical attention and special treatment needed**

No specific antidote. Treat symptomatically and supportively.

5. FIRE - FIGHTING MEASURES

5.1 Extinguishing media

**Suitable extinguishing media:** Dry chemical, carbon dioxide, dry chemical, foam and water spray.

**Unsuitable extinguishing media:** None
5.2 Special hazards arising from the substance or mixture

**Exposure hazards:** Slight fire hazard when exposed to heat or flame. Heat from fire can generate flammable vapor. When mixed with air and exposed to ignition source, vapor can burn in open or explode if confined. The vapor is heavier than air and will accumulate in low area.

**5.3 Advice for firefighters**

**Protection of the fire-fighters:** Firefighters should be equipped with protective equipment and self-contained breathing apparatus to protect against potentially toxic and irritating fumes.

**Other information:** Use cold water spray to cool fire-exposed containers to minimize the risk of rupture.

---

### 6. ACCIDENTAL RELEASE MEASURES

#### 6.1. Personal precautions, protective equipment and emergency procedures

**Personal precautions:** No special protection. Ventilate area of leak or spill. Wear appropriate personal protective equipment. Spills may cause very slippery surfaces. Spread granular cover.

#### 6.2 Environmental precautions

**Environmental precautions:** Prevent contamination of ground and surface water by isolating the hazard area. Contain and recover liquid when possible. Keep closed containers and dispose according to all applicable federal, state or local environment regulations.

#### 6.3 Methods and materials for containment and cleaning up

**Methods of cleaning up:** Remove all ignition sources. Notify fire and environmental authorities. Absorb spills with dry sand, earth or similar non-combustible absorbent material then collect into drums for later disposal. Incinerate or bury in a licensed facility if permitted. For large, dike and pump into suitable containers for disposal. Flush area with plenty of water. Waste water will be send to the WWTP.

**Special precautions:** Do not use combustible materials, such as saw dust. Do not flush to sewer! Slippery walking! Spread granular cover!

#### 6.4 Reference to other sections

Additional advice: Refer to sections 8, 13.
7. HANDLING AND STORAGE

7.1. Precautions for safe handling

Handling: No special measures required. It is not considered a hazardous material in most industrial operations. Sources of ignition such as smoking and open flames are prohibited where this compound is handled. Petol PP 2725 is a hygroscopic product, thus handling should be realized in closed systems, under nitrogen blanked or using other appropriate systems in order to prevent any moisture contact.

Advice on general occupational hygiene: Avoid inhalation or ingestion and contact with skin and eyes. General occupational hygiene measures are required to ensure safe handling of the substance. These measures involve good personal and housekeeping practices (i.e. regular cleaning with suitable cleaning devices), no drinking, eating and smoking at the workplace. Shower and change clothes at end of work shift. Do not wear contaminated clothing at home.

7.2. Conditions for safe storage, including any incompatibilities

Storage: Store in tightly closed containers, in dry and well ventilated areas, between 20-30°C. Prevent any moisture contamination as product is hygroscopic. This may affect reactivity, appearance and performance. Therefore, keep drums tightly closed to prevent contamination. Use dry nitrogen or low dew point air for tank padding.

Incompatible materials: Avoid contact with strong acids, alkalis and oxidizers, water. Avoid unintended contact with isocyanates.

Recommended storage & transport material: Glycerol propoxylated can be shipped and stored in stainless steel tanks, steel drums lined inside, IBC Polyethylene (HDPE) tanks. Mild steel free of mild-scale or rust and maintained in a rust-free condition can also use. Hoses should be of polypropylene, stainless steel or wire bound canvas.

Precautions to be taken in handling and storing:

- Keep well ventilated the areas where the polyether ployol is stored and handled.
- When working with other polyether or other materials such as isocyanates in combination with Petol polyether polyls, please request and reference recommendations for safe handling from all suppliers.
- Handle freshly polymerized parts with care. Be aware of potential hazards of toxic vapors and of heat cure.
SAFETY DATA SHEET
Prepared in accordance with Regulation (EC) 830/2015 amending
Regulation (EC) 1907/2006
PETOL PP 2725

Revision: 3       Last up date:  May 10, 2017       Issued date: May 13, 2011   page 6 /12

- Do not stack fresh polyurethane buns. Stacking can cause create insulation of heat in the
  buns and can result in spontaneous combustion.
- Never expose polyurethane foam to an open flame or other high heat source.

7.3 Specific end use(s)
Please check Section 1.2.

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

8.1 Control parameters

Occupational Exposure Limit (OEL), 8 h TWA : Not established
Short-term exposure limit (STEL), 15 min : Not established

8.2. Exposure control
8.2.1. Engineering controls : No special ventilation is recommended under anticipated conditions
of normal use beyond that needed for normal comfort control. Good general ventilation should
be sufficient for most conditions.

8.2.2. Personal protective equipment
Eye/Face protection: Use chemical safety goggles and/or a full face shield where splashing is
possible. Equipment for eye protection should be tested and approved under appropriate
government standards such as NIOSH (US) or EN 166(EU). Maintain eye wash fountain and quick-
drench facilities in work area.
Skin protection: Not normally considered a skin hazard. Wear impervious protective clothing
including boots, apron, if needed. Wash hands and other exposed area with soap and water before
eating, drinking, smoking and when leaving work.
Hand protection: Handle with gloves which were inspected prior to use. Use proper glove removal
technique (without touching glove's outer surface) to avoid skin contact with this product. The
selected protective gloves have to satisfy the specifications of the standard EN 374 derived from it.
Examples of preferred glove barrier materials:
- Butyl rubber
- Nitrile/butadiene rubber
- Polyvinyl alcohol (“PVA”)
- Neoprene:
- Polyvinyl chloride (PVC or “vynil”)
- Natural rubber (“latex”)

For prolonged or frequently repeated contact a glove with a protection class of 4 or higher
(breakthrough time greater than 120 minutes according to EN 374) is recommended. When only
brief contact is expected, a glove with a protection class of 1 or higher (breakthrough time greater than 10 minutes according to EN 374) is recommended.  

**NOTICE:** The selection of a specific glove for a particular application and duration of use in a workplace should also take into account all relevant workplace factors such as, but not limited to: Other chemicals which may be handled, physical requirements (cut/puncture protection, dexterity, thermal protection), potential body reactions to glove materials, as well as the instructions/specifications provided by the glove supplier.

**Respiratory protection:** No special respirator protection is recommended under anticipated conditions of normal use with adequate ventilation. Where excessive vapor or mist may result from use, use respiratory protection equipment recommended or approved by appropriate local, state or international agency.

**Other precautions:** Maintain shower, eye wash fountain and quick-drench facilities in work area.

**8.2.3. Environmental exposure control:** The product does not pose any risk to the environment. Avoid uncontrolled release of the product in environment.

It remains the user's own responsibility to make sure that the information is appropriate and complete for his special use of this product.

Code: FDS 011
10. STABILITY AND REACTIVITY

10.2. Chemical stability: Stable under normal recommended storage conditions, but hygroscopic (attract water from atmosphere and environment).

10.3. Conditions to avoid: Moisture, ignition sources and incompatibles.

10.4. Incompatible materials: Avoid unintended contact with isocyanates and strong acids, alkalis and oxidizers.

10.5. Hazardous decomposition products: Carbon monoxide, carbon dioxide and aliphatic fragments.

### 11. TOXICOLOGICAL INFORMATION

<table>
<thead>
<tr>
<th>Conclusion</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Acute toxicity</strong></td>
</tr>
<tr>
<td>The product presents a low to very low in acute oral toxicity. In conformity with literature data the most LD50 values range from 2 grams to greater than 10 grams per kilogram of weight for laboratory animals</td>
</tr>
<tr>
<td><strong>Irritation/Corrosion</strong></td>
</tr>
<tr>
<td>Eye: May cause slight irritation, but not corneal damage.</td>
</tr>
<tr>
<td>Skin: Contact with the product is not like to result in a significant irritation.</td>
</tr>
<tr>
<td>Inhalation: At room temperature, exposure to vapors is minimal due to low volatility. May cause slight respiratory irritation.</td>
</tr>
<tr>
<td><strong>Sensitisation</strong></td>
</tr>
<tr>
<td>This product is not a sensitizer.</td>
</tr>
<tr>
<td><strong>Repeated dose toxicity</strong></td>

It remains the user's own responsibility to make sure that the information is appropriate and complete for his special use of this product.

Code: FDS 011
12. ECOLOGICAL INFORMATION

12.1. Ecological Information

Ecotoxicity
This product is not expected to present a hazard to aquatic and terrestrial flora and fauna.

Mobility: The product may enter the environment from industrial waste treatment plant discharges or spills. Low mobility in the environment due to its slight water solubility. No appreciable volatilization from water to air is expected.

Persistence and degradability: Material is expected to degrade only slowly in the environment. Despite the very slow biodegradability rate the product should not present an environmental hazard in surface water / soil.

Bioaccumulative potential: It is not expected to have a bioaccumulative potential.

Other adverse effects: This material is expected to be non-hazardous to aquatic species.

13. DISPOSAL CONSIDERATIONS

This section contains generic advice and guidance.

13.1 Waste treatment methods

13.1.1 Product
Methods of disposal: The generation of waste should be avoided or minimized wherever possible. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe way. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Avoid dispersal of spill material and runoff and contact with soil, waterways, drains and sewers.
13.1.2. Packaging
Methods of disposal: The generation of waste should be avoided or minimized wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.
Do not heat or cut container with electric or gas torch.

Waste Code: No waste key number as per the European Waste Types List can be assigned to this product, since such classification is based on the (as yet undetermined) use to which the product is put by the consumer.

Relevant European legislation regarding waste:

14. TRANSPORT INFORMATION

ADR: Petol PP 2725 is not classified under ADR regulations.
RID: Petol PP 2725 is not classified under RID regulations.
Maritime transport IMDG: Petol PP 2725 is not classified under IMDG regulations.
Air transport ICAO/IATA: Petol PP 2725 is not classified under IATA regulations.

15. REGULATORY INFORMATION

Relevant information regarding the European legislation

European Agreement concerning the International Carriage of Dangerous Goods by Road (ADR)
Regulation referring to the International Carriage of Dangerous Goods by Rail (RID)
International Maritime Dangerous Goods (IMDG)

This information only concerns the above mentioned product and does not need to be valid if used with other product(s) or in any process. The information is to our best present knowledge correct and complete and is given in good faith but without warranty. It remains the user's own responsibility to make sure that the information is appropriate and complete for his special use of this product.
Code: FDS 011
SAFETY DATA SHEET
Prepared in accordance with Regulation (EC) 830/2015 amending
Regulation (EC) 1907/2006
PETOL PP 2725

Revision: 3  Last up date: May 10, 2017  Issued date: May 13, 2011  page 11/12

EU Regulation (EC) No. 1907/2006 (REACH)
Annex XIV - List of substances subject to authorization
Substances of very high concern (CMR): Petol PP 2725 is not subject to authorization procedure.

Annex XVII - Restrictions on the manufacture, placing on the market and use of certain
dangerous substances, mixtures and articles
Petol PP 2725 is not listed on the annex- no restriction

Other EU regulations: Petol PP 2725- is not subject to:
Regulation (EC) No 1005/2009 on substances that deplete the ozone layer
Regulation (EC) No 850/2004 on persistent organic pollutants
Regulation (EC) No 649/2012 concerning the export and import of dangerous chemicals
Directive 2012/18/EU (SEVESO III) of the European Parliament and of the Council on the control
of major-accident hazards involving dangerous substances, amending and subsequently repealing
Council Directive 96/82/EC

15.2 Chemical safety Assessment
An exposure assessment is not required as Petol PP 2725 is a polymer and is not classified and
labeled as hazardous material according to Regulation (EC) No. 1272/2008.

16. OTHER INFORMATION

Data are based on our latest knowledge but do not constitute a guarantee for any specific product
features and do not establish a legally valid contractual relationship.

16.1. Explanations for possible abbreviations mentioned in above section

PBT: Persistent, bioaccumulative and toxic.
vPvB: Very persistent and very bioaccumulative.
ADR: European Agreement concerning the International Carriage of Dangerous Goods by Road
RID: International Carriage of Dangerous Goods by Road
IMDG: International Maritime Dangerous Goods Code
ICAO/IATA: International Civil Aviation Organization/ International Air Transport Association

16.2. Key literature references
The information provided in this SDS is consistent with the information provided in the literature
data. See also:
