1.2. Relevant identified uses of the substance or mixture and uses advised against

Relevant identified uses

Use in industrial settings:
- Industrial use [SU8, SU9] Manufacturing of other substances [PROC1, PROC2, PROC3, PROC4, PROC5, PROC8a, PROC8b, PROC 9, PROC15]
- Industrial use [SU10] Formulation, Repacking and Distribution (PROC1, PROC2, PROC3, PROC4, PROC5, PROC8a, PROC8b, PROC 9, PROC15)
- Industrial use [SU3]: Flexible Foam Industrial Use [PROC1, PROC2, PROC3, PROC4, PROC5, PROC8a, PROC8b, PROC14, PROC15, PROC21]
- Industrial use [SU3]-Rigid foam [PROC 1, PROC 2, PROC 3, PROC 4, PROC 5, PROC 7, PROC 8a, PROC 8b, PROC 15, PROC 21]
- Industrial use [SU3] in Coating [PROC1, PROC2, PROC3, PROC4, PROC5, PROC7, PROC8a, PROC8b, PROC9, PROC10, PROC13, PROC15]
- Industrial use [SU3]; Adhesives & Sealants [PROC1, PROC2, PROC3, PROC4, PROC5, PROC7, PROC8a, PROC8b, PROC9, PROC10, PROC13, PROC14, PROC15]
- Industrial use [SU3]; Elastomers, TPU, Polyamide, Polyimide & Synthetic Fibres [PROC1, PROC2, PROC3, PROC4, PROC5, PROC7, PROC8a, PROC8b, PROC9, PROC14, PROC15]
- Industrial use [SU3]; Composite Material Based on Wood/Mineral/Natural Fibres [PROC1, PROC2, PROC3, PROC4, PROC7, PROC8a, PROC8b, PROC10, PROC14, PROC15, PROC21]
- Industrial use [SU3]; Foundry [PROC1, PROC2, PROC3, PROC5, PROC8a, PROC8b, PROC15]
SAFETY DATA SHEET

Code: FDS 011
2. HAZARDS IDENTIFICATION

2.1. Classification of the substances or the mixture

2.1.1. Classification according to Regulation (EC) 1272/2008 (CLP)
Sucrose, propoxylated: Substance is not classified as dangerous according to Regulation (EC) 1272/2008-as further amended and completed
Glycerol, propoxylated: Substance is not classified as dangerous according to Regulation (EC) 1272/2008- as further amended and completed
As a consequence no classification is required for Petol 400-5G.

2.2. Label elements
Labeling according to Regulation (EC) 1272/2008 (CLP)
Signal word: No signal word

2.3 Other hazard
Substances do not meet the criteria for PBT / vPvB according to regulation 1907/2006, Annex XIII. No other hazards identified.

3. COMPOSITION/INFORMATION ON INGREDIENTS

Impurities
No impurities relevant for classification and labeling

4. FIRST - AID MEASURES

4.1 Description of first aid measures

General Advice: IF exposed or if you feel unwell: Call a Poison Center or doctor/physician. Show this safety data sheet to the doctor in attendance.

Following inhaled: Due to low vapor pressure, this product is not likely to be inhaled when handled at room temperature. When material is heated and/or if a fine mist is being generated, local ventilation and respiratory protection may be required. In this case symptoms may include cough and sometimes slight dizziness. Remove the affected person to fresh air.
If any ill effects appear get medical attention immediately.

**Following skin contact:** Wash skin with soap and plenty of water immediately at least 15 minutes, until no evidence of chemical remains.

**Following eye contact:** Wash eyes immediately with large amounts of lukewarm water or normal saline, occasionally lifting upper and lower lids, until no evidence of chemical remains at least 15 minutes. Get medical attention immediately if pain, blinking, tears or redness persist.

**Following ingestion:** This product has a low to very low oral toxicity. Swallowing small amount of this product is not likely to cause injury. If a polyol is swallowed obtain emergency medical attention.

**4.2. Most important symptoms and effects, both acute and delayed**

**By skin contact:** Skin contact with the product is not like to result in a significant irritation.

**By eye contact:** Contact with eyes not cause irritation.

**By inhalation:** Due to low vapor pressure at room temperature, Petol polyols alone are not likely to be inhaled. The product is not sensitising.

**4.3 Indication of immediate medical attention and special treatment needed**

No specific antidote. Treat symptomatically and supportively.

---

**5. FIRE - FIGHTING MEASURES**

**5.1 Extinguishing media**

*Suitable extinguishing media:* Dry chemical, carbon dioxide, dry chemical, foam and water spray.

*Unsuitable extinguishing media:* Do not use direct water stream as it may spread the fire.

**5.2 Special hazards arising from the substance or mixture**

*Exposure hazards:* Polyether polyols are low in volatility are not considered serious fire hazard. However, in the presence of an existing fire, or under the proper conditions of heat and oxygen, PETOL polyols will burn. Heat or fire may produce decomposition products, which may be hazardous.

**5.3 Advice for firefighters**

*Protection of the fire-fighters:* Firefighters should be equipment with protective equipment and self-contained breathing apparatus to protect against potentially toxic and irritating fumes.

*Fire Fighting Procedures:* Keep unnecessary and unprotected personnel away from entering. Use cold water spray to cool fire-exposed containers to minimize the risk of rupture. Move container
6. ACCIDENTAL RELEASE MEASURES

6.1. Personal precautions, protective equipment and emergency procedures

Personal precautions: No special protection. Ventilate area of leak or spill. Wear appropriate personal protective equipment. Spills may cause very slippery surfaces. Spread granular cover.

6.2 Environmental precautions
Environmental precautions: Prevent contamination of ground and surface water by isolating the hazard area. Contain and recover liquid when possible. Keep closed containers and dispose according to all applicable federal, state or local environment regulations.

6.3 Methods and materials for containment and cleaning up
Methods of cleaning up: Absorb spills with dry sand, earth or similar non-combustible absorbent material then collect into drums for later disposal. Incinerate or bury in a licensed facility if permitted.
Special precautions: Do not use combustible materials, such as saw dust. Do not flush to sewer! Slippery walking! Spread granular cover!

6.4 Reference to other sections
Additional advice: Refer to sections 8, 13.
7.2. Conditions for safe storage, including any incompatibilities

**Storage:** Store in tightly closed containers, in dry and well ventilated areas away from UV radiations, between 20-30°C.

Product will absorb water if the product container is not secured properly. This may affect reactivity, appearance and performance. Therefore, keep drums tightly closed to prevent contamination. Use dry nitrogen or low dew point air for tank padding.

**Incompatible substances:** Avoid contact with strong acids, alkalis and oxidizers (like peroxides and hypochlorite salts), water. Avoid unintended contact with isocyanates.

**Incompatible materials:** Avoid contact with copper, copper alloys and zinc.

**Recommended storage & transport material:** Stainless steel, mild steel free of mild-scale or rust and maintained in a rust-free condition, mild steel drums lined inside, IBC Polyethylene (HDPE) tanks. Hoses should be of polypropylene, stainless steel or wire bound canvas.

7.3 Specific end use(s)

Please check the identified uses from Section 1.2.

---

8. EXPOSURE CONTROLS / PERSONAL PROTECTION

8.1 Control parameters

8.1.1. Occupational Exposure limit values

**Occupational Exposure Limit (OEL), 8 h TWA:** Not established

**Short-term exposure limit (STEL), 15 min:** Not established

8.1.2. Information on monitoring procedures

**Substance name:** Sucrose, propoxylated- EC: 500-029-3, CAS: 9049-71-2

The information is to our best present knowledge correct and complete and is given in good faith but without warranty. It remains the user's own responsibility to make sure that the information is appropriate and complete for his special use of this product.

Code: FDS 011
8.2. Exposure control

8.2.1. Engineering controls: No special ventilation is recommended under anticipated conditions of normal use beyond that needed for normal comfort control. Good general ventilation should be sufficient for most conditions.

8.2.2. Personal Protection Equipment

Eye / Face protection: Use chemical safety goggles and/or a full face shield where splashing is possible. Equipment for eye protection should be tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU). Maintain eye wash fountain and quick-drench facilities in work area.

Skin protection: Not normally considered a skin hazard. Wear impervious protective clothing including boots, apron. Wash hands and other exposed area with soap and water before eating, drinking, smoking and when leaving work.

Hand protection: Handle with gloves which were inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. The selected protective gloves have to satisfy the specifications of the standard EN 374 derived from it. Examples of preferred glove barrier materials:
- Butyl rubber
- Nitrile/butadiene rubber
- Polyvinyl alcohol (“PVA”)
- Neoprene:
- Polyvinyl chloride (PVC or “vynil”)
- Natural rubber (“latex”)

For prolonged or frequently repeated contact a glove with a protection class of 4 or higher (breakthrough time greater than 120 minutes according to EN 374) is recommended. When only brief contact is expected, a glove with a protection class of 1 or higher (breakthrough time greater than 10 minutes according to EN 374) is recommended.

NOTICE: The selection of a specific glove for a particular application and duration of use in a workplace should also take into account all relevant workplace factors such as, but not limited to: Other chemicals which may be handled, physical requirements (cut/puncture protection, dexterity, thermal protection), potential body reactions to glove materials, as well as the instructions/specifications provided by the glove supplier.

Respiratory protection: No special respirator protection is recommended under anticipated conditions of normal use with adequate ventilation. However, if material is heated or sprayed, without sufficient ventilation use an approved air-purifying respirator.
Organic vapor respirator with a particulate pre-filter may be worn if vapors are detected or irritating.
For emergency conditions, use an approved positive-pressure self-contained breathing apparatus. In confined or poorly ventilated areas, use an approved self-contained breathing apparatus or positive pressure air line with auxiliary self-contained air supply.

**Other precautions:** Maintain shower, eye wash fountain and quick-drench facilities in work area.

### 9. PHYSICAL AND CHEMICAL PROPERTIES

**General information**
- **Appearance:** yellow-brownish, clear oil liquid
- **Odor:** Odourless

**Important health, safety and environmental information**
- **pH:** N/A
- **Boiling point:** N/A
- **Flash point:** 200°C
- **Flammability:** Non flammable

**Explosive properties**
- Non explosive

**Oxidizing properties**
- No oxidizing properties

**Vapor pressure**, Pa at 25°C
- N/A

**Specific gravity**, at 25°C
- 1.05 – 1.15, g/m³

**Water solubility**
- Partially soluble

**Partition coefficient** (log **K**<sub>ow</sub>)
- N/A

**Vapor relative density** (air=1)
- N/A

**Dynamic viscosity**, at 25°C
- 5000-11000 cP

**Other informations**
- **Melting point:** N/A
- **Autoignition temperature:** N/A

### 10. STABILITY AND REACTIVITY

**10.1. Reactivity**
Please see chapter 10.5.

**10.2 Chemical stability:** Stable under normal temperature and pressure, but hygroscopic.

**10.4 Conditions to avoid:** Moisture, ignition sources and incompatibles.

**10.5 Incompatible materials:** Isocyanates, strong acids, alkalis and oxidizers.
### 10.6. Hazardous decomposition products:
Carbon monoxide, carbon dioxide and aliphatic fragments.

### 11. TOXICOLOGICAL INFORMATION

Code: FDS 011
12. ECOLOGICAL INFORMATION

12.1. Toxicity

12.1.1. Toxicity for Sucrose, propoxylated

Acute (short-term) toxicity
Fish: *Danio rerio* / freshwater  LC50 (96 h): 6310 mg/L
Aquatic invertebrates: *Daphnia magna* EC50/LC50: 9890 mg/L
Algae/aquatic plants: *Desmodesmus subspicatus* – algae/ Fresh water EC50 (72 h): > 100 mg/L

Chronic (long-term) toxicity
Fish: Waiving according to 2 of REACH Annex IX, long-term toxicity studies with fish do not need to be conducted as based on the available short-term toxicity data the substance is not classified as hazardous.
Aquatic invertebrates: *Daphnia magna* / Fresh water NOEC (21 d): >= 10 mg/L (semistatic) as per OECD Guideline 211
Algae and aquatic plants: *Desmodesmus subspicatus* / Fresh water species EC50 (72 h): > 100 mg/L

12.1.2. Toxicity for Glycerol, propoxylated

Acute (short-term) toxicity
Fish: *Leuciscus idus* / freshwater species  LC50(96 h) >1000 mg/l, according to the OECD 203 guideline
Aquatic invertebrates: *Daphnia magna* / Fresh water species  EC50 (48 h): > 100 mg/L, as per OECD Guideline 202
Algae and aquatic plants: *Desmodesmus subspicatus* / Fresh water species  EC50 (72 h): > 100 mg/L / (static), as per OECD Guideline 201

Chronic (long-term) toxicity
Fish: Waiving according to 2 of REACH Annex IX, long-term toxicity studies with fish do not need to be conducted as based on the available short-term toxicity data the substance is not classified as hazardous.
Aquatic invertebrates: *Daphnia magna* / Fresh water NOEC (21 d): >= 10 mg/L (semistatic) as per OECD Guideline 211
Algae and aquatic plants: *Desmodesmus subspicatus* / Fresh water  EC50 (72 h): > 100 mg/L

Toxicity to soil macro-organisms: In accordance with column 2 of REACH Annexes IX and X, there is no need to further investigate the effects of the substance on terrestrial organisms.

Toxicity to terrestrial plants: In accordance with column 2 of REACH Annexes IX and X, there is no need to further investigate the effects of the substance on terrestrial organisms.

Toxicity to birds: In accordance with column 2 of REACH Annexes IX and X, there is no need to further investigate the effects of the substance on terrestrial organisms.

12.2. Persistence and degradability: The substance does not meet the PBT screening criteria as outlined in Directive 2006/121/EC (Appendix A).

12.3. Bioaccumulative potential: the substance does not meet the B/vB criterion.

12.4. Mobility in soil
The substance is not a PBT/vPvB, therefore the emission characterisation does not need to be conducted.

12.5. Results of PBT and vPvB assessment: This mixture does not contain any substances that are assessed to be a PBT or a vPvB.

13. DISPOSAL CONSIDERATIONS

This section contains generic advice and guidance.

13.1 Waste treatment methods

13.1.1 Product
Methods of disposal: The generation of waste should be avoided or minimized wherever possible. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe way. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Avoid dispersal of spill material and runoff and contact with soil, waterways, drains and sewers.

Waste Code: No waste key number as per the European Waste Types List can be assigned to this product, since such classification is based on the (as yet undetermined) use to which the product is put by the consumer.
13.1.2. Packaging
Methods of disposal: The generation of waste should be avoided or minimized wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.

Relevant European legislation regarding waste:

14. TRANSPORT INFORMATION

ADR: Petol 400-5G is not classified as dangerous under ADR regulations.
RID: Petol 400-5G, propoxylated is not classified as dangerous under RID regulations.
Maritime transport IMDG: Petol 400-5G is not classified as dangerous under IMDG regulations.
Air transport ICAO/IATA: Petol 400-5G is not classified as dangerous under IATA regulations

15. REGULATORY INFORMATION

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

Relevant information regarding the European legislation
European Agreement concerning the International Carriage of Dangerous Goods by Road (ADR)

This information only concerns the above mentioned product and does not need to be valid if used with other product(s) or in any process. The information is to our best present knowledge correct and complete and is given in good faith but without warranty. It remains the user's own responsibility to make sure that the information is appropriate and complete for his special use of this product.
Code: FDS 011
SAFETY DATA SHEET
Prepared in accordance with Commission Regulation 830/2015, amending
Regulation (EC) 1907/2006 (RAECH)

PETOL PZ 400-5G

Revision:3 Last update: September 15, 2016 Issued date: December, 2010 page 14

Regulation referring to the International Carriage of Dangerous Goods by Rail (RID
International Maritime Dangerous Goods (IMDG))

Authorization: Petol PZ 400-5G is not subject for authorization
Restrictions on use: no restriction

Other EU regulations: Petol PZ 400-5G is not subject to:
- Regulation (EC) No 1005/2009 on substances that deplete the ozone layer
- Regulation (EC) No 850/2004 on persistent organic pollutants
- Regulation (EC) No 649/2012 concerning the export and import of dangerous chemicals
- Directive 2012/18/EU -SEVESO III Directive

15.2 Chemical safety Assessment
An exposure assessment is not required as Petol PZ 400-5G is not classified and labeled as
hazardous material according to Regulation (EC) No. 1272/2008.

16. OTHER INFORMATION
Data are based on our latest knowledge but do not constitute a guarantee for any specific product
features and do not establish a legally valid contractual relationship.

16.1. Abbreviation and acronyms (NOT ALL ARE USED IN THIS SDS)
- AC: Article category
- ADR: European agreement concerning the international carriage of dangerous goods by road
- BSAF: Bio soil accumulation factor
- BCF: Bio concentration factor
- CAS: Chemical Abstracts Service
- CLP: Classification, labelling and packaging
- CMR: Carcinogenic, mutagenic or toxic for reproduction
- CSA/CSR: Chemical safety assessment / Chemical safety report
- DNEL: Derived no effect level
- EC10: Concentration of a substance where 10% of the population is affected
- EC50: Concentration of a substance where 50% of the population is affected
- ECHA: European chemicals agency
- EINECS: EU list of existing chemical substances
- EmS: Emergency schedule
- ERC: Environmental release category
- ES: Exposure scenario
- eSDS: Extended safety data sheet
- GHS: Globally harmonised system
- IATA-DGR: International air transport association - dangerous goods regulations

This information only concerns the above mentioned product and does not need to be
valid if used with other product(s) or in any process. The information is to our best present knowledge correct and
complete and is given in good faith but without warranty. It remains the user's own responsibility to make sure that the
information is appropriate and complete for his special use of this product.

Code: FDS 011
SAFETY DATA SHEET
Prepared in accordance with Commission Regulation 830/2015, amending
Regulation (EC) 1907/2006 (RAECH)
PETOL PZ 400-5G

Revision:3  Last up date: September 15, 2016  Issued date: December, 2010  page 15/16

This information only concerns the above mentioned product and does not need to be
valid if used with other product(s) or in any process. The information is to our best present knowledge correct and
complete and is given in good faith but without warranty. It remains the user's own responsibility to make sure that the
information is appropriate and complete for his special use of this product.
Code: FDS 011

16.2. Key literature references
The information provided in this SDS is consistent with the information provided in the REACH
CSRs for sucrose, propoxylated and glycerol, propoxylated. The CSRs contains a complete
reference list for all data used. Non confidential data from the REACH registration dossiers of
sucrose, propoxylated and glycerol, propoxylated are published by the ECHA, see
https://echa.europa.eu/information-on-chemicals/registered-substances and
http://echa.europa.eu/clp/c_1_inventory_en.asp
http://chelist.jrc.ec.europa.eu

16.3. Revision: Revision 3 replaced revision no.2 dated November 23, 2015
All chapters of this safety data sheet have been revised according to the provision of
SAFETY DATA SHEET
Prepared in accordance with Commission Regulation 830/2015, amending
Regulation (EC) 1907/2006 (RAECH)

PETOL PZ 400-5G
