1. IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

1.1. Product identifier

<table>
<thead>
<tr>
<th>Trade name</th>
<th>PETOL 56-3</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chemical names</td>
<td>1,2,3-Propanetriol methyloxirane polymer; Glycerine propylene oxide polymer; Glycerine-propoxylated polyether polyol</td>
</tr>
<tr>
<td>CAS no.</td>
<td>25791-96-2</td>
</tr>
<tr>
<td>REACH Registration number</td>
<td>Exempted from registration according to the provision of Article 2(9) of REACH.</td>
</tr>
<tr>
<td>Molecular weight</td>
<td>3000</td>
</tr>
</tbody>
</table>

1.2. Relevant identified uses of the substance or mixture and uses advised against

**Uses of the substance/preparation**

**Petol 56-3** is a homopolymer triol, designed to increase the hardness of flexible foams and to produce CME (Combustion Modified Ether) flexible polyurethane foams.

It is a BHT-free product that can be processed on various foam machinery. It is also be used in polyol blends for rigid foam production.

**Uses advise against:**

There are no uses advised against.

1.3. Details of the supplier of the safety data sheet

<table>
<thead>
<tr>
<th>Name</th>
<th>S.C. OLTCHIM S.A</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
</tbody>
</table>
2. HAZARDS IDENTIFICATION

2.1. Classification of the substances or the mixture

2.1.1. Classification according to Regulation (EC) 1272/2008 (CLP)
Petol 56-3 is not classified according to Regulation (EC) 1272/2008

2.2.1. Label elements
Labeling according to Regulation (EC) 1272/2008

Signal word: No signal word
No label according to Regulation (EC) 1272/2008

2.3 Other hazard: The substance does not meet the criteria for PBT or vPvB substance.
No other hazards identified.

3. COMPOSITION/INFORMATION ON INGREDIENTS

<table>
<thead>
<tr>
<th>Identification name</th>
<th>CAS no.</th>
<th>Weight content, % (w/w)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1,2,3-Propanetriol methyloxirane polymer</td>

<td>100</td>
</tr>
</tbody>
</table>

Impurities: No impurities relevant for classification and labeling.

4. FIRST - AID MEASURES

4.1 Description of first aid measures

General Advice: IF exposed or if you feel unwell: Call a Poison Center or doctor/physician. Show this safety data sheet to the doctor in attendance.

This information only concerns the above mentioned product and does not need to be valid if used with other product(s) or in any process. The information is to our best present knowledge correct and complete and is given in good faith but without warranty. It remains the user’s own responsibility to make sure that the information is appropriate and complete for his special use of this product.
Code: FDS 011
SAFETY DATA SHEET

PETOL 56-3
Revision: 3 Last up date: August 25, 016 Issued date: February, 2011 page 3/13

Following inhalation: Due to low vapor pressure, this product is not likely to be inhaled when handled at room temperature. When material is heated and/or if a fine mist is being generated, local ventilation and respiratory protection may be required. Remove the affected person to fresh air. If any ill effects appear get medical attention immediately.

Following skin contact: Wash skin with soap and plenty of water immediately at least 15 minutes, until no evidence of chemical remains. If skin irritation occurs give medical attention

Following eye contact: Wash eyes immediately with large amounts of water or normal saline, occasionally lifting upper and lower lids, until no evidence of chemical remains at least 15 minutes. Get medical attention immediately if pain, blinking, tears or redness persist.

Following ingestion: Glycerol propoxylated polyol has low to very low oral toxicity. If polyol is swallowed, give large amount of water to dilute, but never give fluids if patient is unconscious or is having convulsions. For large amount of polyol swallowed, seek medical attention.

4.2. Most important symptoms and effects, both acute and delayed
By skin contact: Skin contact with the product is not like to result in a significant irritation.
By eye contact: Contact with eyes cause slight temporary irritation.
By inhalation: Due to low vapor pressure at room temperature, Petol polyols alone are not likely to be inhaled. Inhalation of vapors from heated materials may cause respiratory irritation and symptoms may include cough and sometimes slight dizziness. The product is not sensitising.

4.3. Indication of immediate medical attention and special treatment needed
No specific antidote. Treat symptomatically and supportively.

5. FIRE - FIGHTING MEASURES

5.1 Extinguishing media
Suitable extinguishing media: Dry chemical, carbon dioxide, dry chemical, foam and water spray.
Unsuitable extinguishing media: Do not use direct water stream as it may spread the fire.

5.2 Special hazards arising from the substance or mixture

Exposure hazards: Petol polyol have a low vapours pressure and a flash point above 200°C and consequently are not considered to have a serious fire hazard. However, due the fact that it is an organic material, this polyol will burn under the right conditions of heat and oxygen supply or in
presence of an existing fire. Heat from fire can generate hazardous vapors. Burning liquids may be moved by flushing water to protect personnel and minimize damage. Do not use direct water stream as it may spread the fire.

5.3 Advice for firefighters

Protection of the fire-fighters: Firefighters should be equipment with protective equipment and self-contained breathing apparatus to protect against potentially toxic and irritating fumes.

Fire Fighting Procedures: Keep unnecessary and unprotected personnel away from entering. Use cold water spray to cool fire-exposed containers to minimize the risk of rupture. Move container from fire area if this is possible without hazard. Burning liquids may be moved by flushing with water to protect personnel and minimize property damage. Contain fire water run-off if possible. Fire water run-off, if not contained, may cause environmental damage.

6. ACCIDENTAL RELEASE MEASURES

6.1. Personal precautions, protective equipment and emergency procedures

Personal precautions: No special protection. Ventilate area of leak or spill. Wear appropriate personal protective equipment. Spills may cause very slippery surfaces. Spread granular cover. Remove sources of ignition and surrounding the affected area.

6.2 Environmental precautions

Environmental precautions: Petol polyol is nonvolatile, making evaporation to the atmosphere unlikely. Product would not persist in the environment and would be removed by biological wastewater-treatment facilities. Small spills should be absorbed with sand or sawdust. Material spilled on concrete and metal surfaces may cause a slipping hazard.

If a large spill does occur, the material should be captured, collected, and reprocessed or disposed of according to applicable governmental requirements.

6.3 Methods and materials for containment and cleaning up

Methods of cleaning up: Absorb spills with dry sand, earth or similar non-combustible absorbent material then collect into drums for later disposal. Incinerate or bury in a licensed facility if permitted.
Special precautions: Do not use combustible materials, such as saw dust. Do not flush to sewer! Slippery walking! Spread granular cover!

6.4 Reference to other sections: Additional advice: Refer to section 8, 13.

7. HANDLING AND STORAGE

7.1. Precautions for safe handling

Handling: No special measures required. It is not considered a hazardous material in most industrial operations. Sources of ignition such as smoking and open flames are prohibited where this compound is handled. Petol 56-3 is a hygroscopic product, thus handling should be realized in closed systems, under nitrogen blanked or using other appropriate systems in order to prevent any moisture contact.

Advice on general occupational hygiene: Avoid contact with skin and eyes. General occupational hygiene measures are required to ensure safe handling of the substance. These measures involve good personal and housekeeping practices (i.e. regular cleaning with suitable cleaning devices), no drinking, eating and smoking at the workplace. Shower and change clothes at end of work shift. Do not wear contaminated clothing at home.

7.2. Conditions for safe storage, including any incompatibilities

Storage: Store in tightly closed containers/tanks, in dry and well ventilated areas away from UV radiation, between 20-30°C. Prevent any moisture contamination as product is hygroscopic. This may affect reactivity, appearance and performance. Drums should be stacked to a maximum of 3 high.

Incompatible substances: Avoid contact with strong acids, alkalis and oxidizers (like peroxides and hypochlorite salts), water. Avoid unintended contact with isocyanates.

Incompatible materials: Avoid contact with copper, copper alloys and zinc.

Recommended storage material: Petol polyol can be shipped and stored in stainless steel tanks, steel drums lined inside, IBC Polyethylene (HDPE) tanks. Hoses should be of polypropylene, stainless steel or wire bound canvas.

Precautions to be taken in handling and storing:
- Keep well ventilated the areas where the polyether ployol is stored and handled.
8. EXPOSURE CONTROLS / PERSONAL PROTECTION

8.1 Control parameters

8.1.1. Occupational Exposure limit values

Occupational Exposure Limit (OEL), 8 h TWA: Not established
Short-term exposure limit (STEL), 15 min: Not established

8.2. Exposure control

8.2.1. Engineering controls: No special ventilation is recommended under anticipated conditions of normal use beyond that needed for normal comfort control. Good general ventilation should be sufficient for most conditions.

Eye/Face protection: Use chemical safety goggles and/or a full face shield where splashing is possible. Equipment for eye protection should be tested and approved under appropriate government standards such as NIOSH (US) or EN 166 (EU). Maintain eye wash fountain and quick-drench facilities in work area.

Skin protection: Not normally considered a skin hazard. Wear impervious protective clothing including boots, apron, if needed. Wash hands and other exposed area with soap and water before eating, drinking, smoking and when leaving work.

Hand protection: Handle with gloves which were inspected prior to use. Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. The selected protective gloves have to satisfy the specifications of the standard EN 374 derived from it.

Examples of preferred glove barrier materials:
- Butyl rubber
- Nitrile/butadiene rubber

This information only concerns the above mentioned product and does not need to be valid if used with other product(s) or in any process. The information is to our best present knowledge correct and complete and is given in good faith but without warranty. It remains the user's own responsibility to make sure that the information is appropriate and complete for his special use of this product.

Code: FDS 011
SAFETY DATA SHEET
Prepared in accordance with accordance with Commission regulation (EU) 830/2015 amending Regulation (EC) No 1907/2006 (REACH)

PETOL 56-3

Revision: 3  Last up date: August 25, 016  Issued date: February, 2011  page 7/13

- Polyvinyl alcohol (“PVA”)
- Neoprene:
- Polyvinyl chloride (PVC or “vynil”)
- Natural rubber (“later”)

For prolonged or frequently repeated contact a glove with a protection class of 4 or higher (breakthrough time greater than 120 minutes according to EN 374) is recommended. When only brief contact is expected, a glove with a protection class of 1 or higher (breakthrough time greater than 10 minutes according to EN 374) is recommended.

NOTICE: The selection of a specific glove for a particular application and duration of use in a workplace should also take into account all relevant workplace factors such as, but not limited to: Other chemicals which may be handled, physical requirements (cut/puncture protection, dexterity, thermal protection), potential body reactions to glove materials, as well as the instructions/specifications provided by the glove supplier.

Respiratory protection: No special respirator protection is recommended under anticipated conditions of normal use with adequate ventilation. However, if material is heated or sprayed, without sufficient ventilation use an approved air-purifying respirator. Organic vapor respirator with a particulate pre-filter may be worn if vapors are detected or irritating.

For emergency conditions, use an approved positive-pressure self-contained breathing apparatus. In confined or poorly ventilated areas, use an approved self-contained breathing apparatus or positive pressure air line with auxiliary self-contained air supply.

Other precautions: Maintain shower, eye wash fountain and quick-drench facilities in work area.

9. PHYSICAL AND CHEMICAL PROPERTIES

General information
Appearance
Clear, viscous liquid
Odor
Odourless or mild odor

Important health, safety and environmental information
pH
N/A
Boiling point
Decomposes.
Flash point, min
200°C
Flammability
non Flammable
Explosive properties
Non explosive

This information only concerns the above mentioned product and does not need to be valid if used with other product(s) or in any process. The information is to our best present knowledge correct and complete and is given in good faith but without warranty. It remains the user’s own responsibility to make sure that the information is appropriate and complete for his special use of this product.

Specific gravity, at 25°C 1.005. g/cm³
Water solubility Partially soluble
Partition coefficient (log K_{ow}) N/A
Vapor relative density (air=1) N/A
Dynamic viscosity, at 25°C 400-600 cP

Other informations
Melting point N/A
Autoignition temperature N/A

10. STABILITY AND REACTIVITY

10.1. Reactivity
Polyol reactivity varies with increasing primary hydroxyl content (at a constant unsat).

10.2 Chemical stability: Stable under normal recommended storage conditions. Hygroscopic (attract water from atmosphere and environment). Contact with diisocyanates leads to an exothermically polymerization reaction.

10.4 Conditions to avoid: Moisture, ignition sources and incompatibles.

10.5. Incompatible materials: Avoid contact with strong acids, alkalis and oxidizers such as peroxides and hypochlorite salts, water. Avoid unintended contact with isocyanates

10.6. Hazardous decomposition products: Carbon monoxide, carbon dioxide and aliphatic fragments.

11. TOXICOLOGICAL INFORMATION

This information only concerns the above mentioned product and does not need to be valid if used with other product(s) or in any process. The information is to our best present knowledge correct and complete and is given in good faith but without warranty. It remains the user’s own responsibility to make sure that the information is appropriate and complete for his special use of this product.

Code: FDS 011
**SAFETY DATA SHEET**

**PETOL 56-3**

| Revision: 3 | Last up date: August 25, 016 | Issued date: February, 2011 | page 9/13 |

Skin: Contact with the product is not likely to result in a significant irritation.
Skin-rabbit LD50 > 16 ml/kg
Inhalation: At room temperature, exposure to vapors is minimal due to low volatility. May cause slight respiratory irritation.
Inhalation-rat LC50 > 200mg/l/h

**Sensitisation**
This product is not a sensitizer.

**Repeated dose toxicity**
Not available data. Repeated or prolonged is not known to aggravate medical condition.

**Mutagenity**
Genetic toxicity: negative

**Carcinogenity**
Product is of no concern with regard to carcinogenicity.

**Toxicity for reproduction**
Product is not toxic for reproduction.

**Chronic effects**
Based on available data, repeated exposures are not expected to cause significant adverse effects.

---

**12. ECOLOGICAL INFORMATION**

**12.1. Toxicity:** This polyol is not expected to present a hazard to aquatic organism (LC50/EC50 > 1000 mg/L for the most sensitive species tested)

**Mobility:** This product are nonvolatile and water soluble, so environmental releases would tend to migrate toward or remain in water. They would not persist in the environment and would be removed by biological wastewater-treatment facilities.

**Persistence and degradability:** Material is expected to degrade in the environment.

**Bioaccumulative potential:** It is not expected to have a bioaccumulative potential.

---

**13. DISPOSAL CONSIDERATIONS**

This section contains generic advice and guidance.

---

This information only concerns the above mentioned product and does not need to be valid if used with other product(s) or in any process. The information is to our best present knowledge correct and complete and is given in good faith but without warranty. It remains the user’s own responsibility to make sure that the information is appropriate and complete for his special use of this product.

Code: FDS 011
13.1 Waste treatment methods

13.1.1 Product
Methods of disposal: The generation of waste should be avoided or minimized wherever possible. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe way. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Avoid dispersal of spill material and runoff and contact with soil, waterways, drains and sewers.

13.1.2. Packaging
Packaging disposal: The generation of waste should be avoided or minimized wherever possible. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.
Do not heat or cut container with electric or gas torch.

Waste Code: No waste key number as per the European Waste Types List can be assigned to this product, since such classification is based on the (as yet undetermined) use to which the product is put by the consumer.

Relevant European legislation regarding waste:

14. TRANSPORT INFORMATION

ADR: Petol 56-3 is not classified under ADR regulations.

RID: Petol 56-3 is not classified under RID regulations.

Maritime transport IMDG: Petol 56-3 is not classified under IMDG regulations.

Air transport ICAO/IATA: Petol 56-3 is not classified under IATA regulations.
15. REGULATORY INFORMATION

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

Relevant information regarding the European legislation

European Agreement concerning the International Carriage of Dangerous Goods by Road (ADR)
Regulation referring to the International Carriage of Dangerous Goods by Rail (RID)

International Maritime Dangerous Goods (IMDG)

Authorization: Petol 56-3 is not subject to authorisation procedure.

Restrictions on use: no restriction

Other EU regulations: Is not a SEVESO substance, not ozone depleting substance and not a persistent organic pollutant.

15.2 Chemical safety Assessment
An exposure assessment is not required as Petol 56-3 is a polymer and is not classified and labeled as hazardous material according to Regulation (EC) No. 1272/2008.
16. OTHER INFORMATION
Data are based on our latest knowledge but do not constitute a guarantee for any specific product features and do not establish a legally valid contractual relationship.
